About the portal

The task of the portal is to shorten the gap between the administration and the citizens. For this purpose, citizens are given the opportunity to actively offer ideas or point out problems. This is through the Unsuccessful Signals Portal that can describe the problem, display photo material, and all of this data be geo referenced by linking them to a specific location.

Citizens have the opportunity to actively point out problems or offer ideas in their chosen themes through the features the portal offers.

Citizens can use the feature I have an idea through which they present their ideas to the Municipal Council without having any limitation.

In order to preserve the good tone and eliminate provocative texts or hate language texts, Moderator will have the right to edit or remove inappropriate text for the audience.

The capabilities of the system include managing the following stages:

- Collection of suggestions - the step consists of introducing ideas from users of the system that are only visible to them and to system moderators.
- Public discussion of selected proposals - once a proposal has been approved for discussion by moderators, it is automatically proposed for public discussion by citizens. During this stage, all users of the system have the opportunity to express their opinion on the specific issues.
- The public consultation function allows for the vote on the proposals already discussed. With the results of the voting, these proposals are offered for decision by the municipal councils.

The system provides the opportunity to create polls in which a proposal can be voted on. Polls are an appropriate tool for extra information related to the attitude of users to an idea.

- Making suggestions from local authorities - Once an idea has gone through all stages described above, if it is approved, the stage of its implementation begins. During the implementation it is possible to publish information about the concrete progress and implementation of the idea.
- Posting results - After the conversion stage, the platform provides the opportunity to describe the results, the realization of the concrete ideas. The publication of the results is done through the "Successful Projects" function.

NON-URGENT ALERT PORTAL "MAYOR, LOOK!" (WWW.KMETEVIJ.COM) AND MOBILE APP

“Mayor, Look!” is a web portal and mobile app for easy reporting of non-urgent signals of various nature to municipal administrations. The app has options for:

- Text registration
- Photo registration
- Registration of alert coordinates

PROJECT: IMPROVING ACCESS TO JUSTICE FOR PEOPLE LIVING BELOW THE POVERTY LINE

Active campaign by the municipality of Dalgopol to inform that any person living below the poverty line who needs legal advice on any case can get it from a lawyer.

The consultation is provided in all settlements of the municipality.

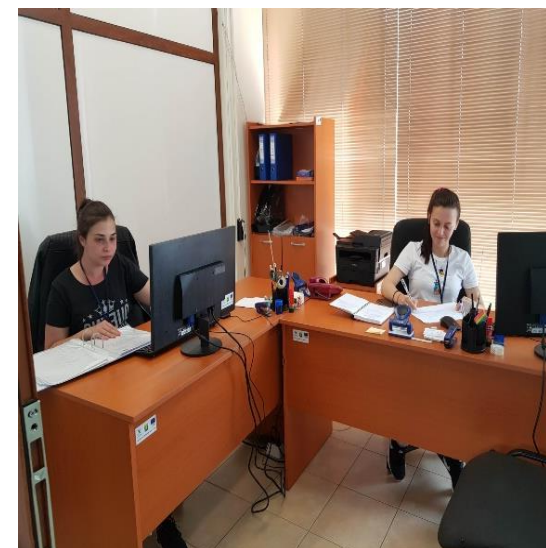

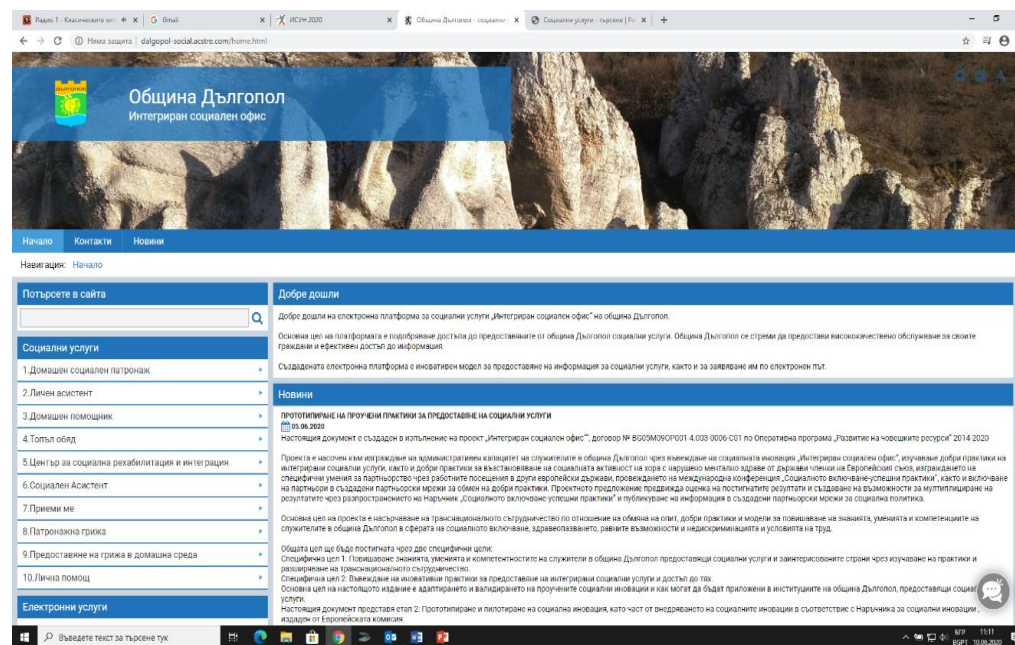

A group consultation was also held for the rights of citizens.

STUDENTS FROM “IVAN VAZOV” PRIMARY SCHOOL PARTICIPATE IN THE INTERNATIONAL FESTIVAL OF ARTS “Art TALENTS” IN KRANSKA GORA, SLOVENIA

Students from “Ivan Vazov” Primary School competed with participants from Italy, Ukraine, Slovenia, Croatia and Bulgaria. In addition to the prizes in the three categories and the Grand Prix for overall contribution to folklore, they visited many local sights, got acquainted with local traditions and lifestyle, but also had interesting meetings and exchanged many interesting ideas.

EUROPEAN BIRD DAY

In March 1902, the International Convention on the Protection of Birds was adopted in Paris.

Guided by the motto: "A Grain of Love" for sparrows and other urban birds in the winter, the students of fourth grade of St. Kliment Ohridski School - Dalgopol celebrated this day by making and placing feeders in the school yard.
